To Whom It May Concern:

Seldom does the opportunity arise to commend someone for a job well done, but when it comes to Galyn Clark and the Clark Corporation, it certainly is well deserved.

Galyn worked with my wife and I for over 18 months as we designed and built our new dental office. During that time, I came to appreciate his creative insight, expert advice, and careful attention to details and financial matters.

Our new office involves two levels with 5300 sq. ft. on the upper level and 3500 sq. ft. on the lower level. Galyn gave me initial estimates which gave a range of costs that would ultimately be determined by the final design. Following the completion of the architectural designs and site work, he was very careful to itemize all bids to find the best subcontractors for the price. As in any project, design changes that were made during construction led to cost changes. What I found interesting was that each of these changes were carefully itemized and discussed with me, with a very fair distribution of those costs either to be covered by myself or the Clark Corporation.

Because we were building over the winter, we were partly at the whim of the weather as to a final completion date. Had it not been for an incredibly wet spring slowing the completion of the parking lots, the project would have finished ahead of schedule.

I believe anyone choosing the Clark Corporation will enjoy working with Galyn and his employees. They are professional, attentive to details, and very cost conscious. Not a day goes by that we don't receive several compliments on the appearance of our new office, and we are happy to give a lot of the credit to the Clark Corporation.

I'd like to extend an invitation to anyone who would like to tour our office (by appointment) and evaluate the quality provided to us by Galyn's company and the subcontractors. I believe you will be impressed.

Sincerely,

Robert M. Pollard, D.D.S.
